

Yarning Circle

CONVERSATIONAL INTERFACE • THE FRONT DOOR TO DUKES

GULANGA

PART OF THE GULANGA.AI PORTFOLIO

Where people yarn with their organisation's knowledge.

Yarning Circle is the **secure, plain-language chat interface that sits on top of Dukes**, Gulanga's sovereign large language model. It turns a powerful AI engine into an everyday tool: a place where staff can ask questions, draft and analyse work, and put agents to task, all grounded in their own trusted, on-shore knowledge and with the source of every answer visible.

CHAT • AGENTS • EVIDENCE-LINKED • HOSTED IN AUSTRALIA • NEVER USED TO TRAIN MODELS

Ask. Draft. Analyse. Act.

ONE CONVERSATION ACROSS EVERYTHING YOU KNOW

Ask

Plain-language questions across your documents, policies and systems, with no hunting through folders.

Draft

Briefs, proposals and reports that start from your organisation's own experience, not a blank page.

Analyse

Summarise large volumes of material into themes, concerns and gaps, each referenced to its source.

Act

Put Dukes agents to work, with the right permissions and approval workflows in place.

Yarning in practice

EVERY CLAIM CARRIES A REFERENCE

• Policy & government

Turn dozens of public submissions into a ministerial brief showing the themes and where views diverge.

• Legal, audit & compliance

Compare contracts and procedures against updated requirements and flag what no longer aligns.

• Tenders & proposals

Draw on past winning bids so each new response builds on what has already worked.

• Defence & technical teams

Find the right procedure across many manuals, even on disconnected, high-security networks.

SAME SOVEREIGN GUARANTEES AS DUKES

Secure Australian cloud • Your own environment • Fully offline • Multilingual

Rooted in the yarning circle

WHY THE NAME MATTERS

The yarning circle is a long-standing First Nations practice of sharing knowledge, listening and making decisions together as equals. That is the experience Yarning Circle is designed to create: not a black box that hands down answers, but a place where people and AI reason together, with every insight open to challenge.

LISTEN

Answers grounded in your own knowledge, terminology and way of working.

SHARE

User permissions and separate libraries control exactly who sees what.

DECIDE TOGETHER

Transparent sourcing and evidence behind every response.

Every yarn creates opportunity. Yarning Circle runs on Dukes, and a portion of Dukes token consumption revenue is allocated by Gulanga to Indigenous education, skills and employment programs.

Australian AI. Australian data. Indigenous impact.

Oldest continuous culture, newest contemporary technology.

*The conversational front door to Dukes,
Gulanga's sovereign AI engine.*
